

Join California High-Speed Rail for “The State of the Future”

[Article originally appeared in <https://hsr.ca.gov>]

Beat the heat this weekend, and join the California High-Speed Rail Authority for the grand opening of the first-ever full-scale project exhibit at the California State Fair. The State of the Future will take visitors through the history of the project – from construction into operations of the nation’s first 220 mph electrified high-speed train system.

The largest feature will be the mock-ups of our future train interiors, where visitors will get a chance to check out the different seating options, take a selfie in the cocoon seat, and learn more about future operations. The Authority expects to initiate 171 miles of electrified high-speed rail passenger service between Merced and Bakersfield between 2030 and 2033.

For those who want a different look, virtual reality headsets will allow visitors of all ages to experience the Authority’s trains and stations and even try their hand as an iron worker on the project.

And we didn’t forget about our youngest exhibit visitors – and our future riders – as we’ll have a play area so there’s something to do for the whole family. Come join us in Building 5, July 12 through 28 to learn more about this transformative project, hear from experts on future job opportunities and join us for discussions on careers in the building trades.

Sacramento Republic FC Fans who purchase a ticket to Saturday’s match will also receive free entrance into the fair, thanks to our partner agencies, Caltrans and the California Office of Traffic Safety.

For the latest on high-speed rail construction including the more than 25 active job sites underway in the Central Valley, visit: www.buildhsr.com.

Construction Employment Increases In 35 States Between June 2023 And June 2024, While 29 States Add Jobs From May To Last Month

[Article originally appeared in www.agc.org]

Construction employment increased in 35 states in June from a year earlier, while 29 states added construction jobs between May and June, according to a new analysis of federal employment data released by the Associated General Contractors of America today. Association officials noted that demand for construction and construction workers remains strong in many parts of the country despite slowdowns in certain market segments.

“Construction employment continues to rise in a majority of states despite slowdowns in multifamily and commercial projects,” said Ken Simonson, the association’s chief economist. “But finding qualified workers to execute huge data center, manufacturing, energy, and infrastructure projects is a challenge in many states.”

Between June 2023 and June 2024, 35 states added construction jobs, while 14 states and the District of Columbia shed jobs. Construction employment was unchanged in Rhode Island. Texas added the most construction employees (36,100 or 4.4 percent), followed by Florida (29,900 jobs, 4.8 percent), Michigan (14,400 jobs, 7.6 percent), and Nevada (12,800 jobs, 11.5 percent). Alaska had the largest percentage increase over 12 months (19.5 percent, 3,300 jobs), followed by Nevada, Hawaii (10.5 percent, 4,000 jobs), and Michigan.

New York lost the most construction jobs during the past 12 months (-5,400 jobs, -1.4 percent), followed by Colorado (-4,200 jobs, -2.3 percent), Maryland (-4,200 jobs, -2.6 percent), and Oregon (-2,300 jobs, -2.0 percent). The largest percentage loss was in D.C. (-4.7 percent, -700 jobs), followed by Maine (-3.8 percent, -1,300 jobs), Maryland, Colorado, and Oregon.

For the month, industry employment increased in 29 states, declined in 17 states and D.C., and was unchanged in Alaska, New Jersey, New Mexico, and Wyoming. Texas added the most jobs (5,100 or 0.6 percent), followed by Ohio (3,600 jobs, 1.5 percent), Florida (3,400 jobs, 0.5 percent), and Nevada (3,300 jobs, 2.7 percent). Nevada had the largest percentage gain, followed by Ohio and Tennessee (1.3 percent, 2,000 jobs).

New York lost the most construction jobs from May to June (-4,400 or -1.1 percent), followed by Colorado (-1,100 jobs, -0.6 percent), Georgia (-700 jobs, -0.3 percent), Illinois (-600 jobs, -0.3 percent), and Maine (-600 jobs, -1.8 percent). Vermont lost the highest percentage of jobs (-1.9 percent, -300 jobs), followed by Maine, North Dakota (-1.4 percent, -400 jobs), D.C. (-1.4 percent, -200 jobs), and New York.

Association officials urged Congress to explore ways to increase funding for career and

technical education programs – which include construction prep – as they focus on fiscal year 2025 funding levels for the Departments of Education and Labor. They noted that federal officials currently spend significantly more on four-year college programs than they do on preparing workers for careers in fields like construction.

“Instead of continuing to encourage everyone to amass a lot of college debt, Congress has an opportunity to help get many more people into high-paying careers in fields like construction,” Jeffrey D. Shoaf, the association’s chief executive officer, said. “Boosting funding for programs that expose students to multiple career paths – including construction – will ease labor shortages that are undermining economic growth.”

Subcontractor Solicitation of Interest
Kenneth Hahn Hall of Administration – Base Isolation Seismic Retrofit
Los Angeles, CA

McCarthy Building Companies, Inc., working as the Construction Manager at Risk in conjunction with the Department of Public Works for Los Angeles County, is soliciting interest from qualified subcontractors to participate in the bidding for award phase of the project.

Project description: The Hall of Administration Base Isolation Seismic retrofit project consists of the installation of seismic isolators under the foundation of the existing building. Hydraulic jacks and temporary load-bearing shoring will be installed in phases to support and transfer the gravity loads from the existing columns/walls to new support foundations. Seismic strengthening of the superstructure using new concrete shear walls is required at select interior locations. These interior locations will require demolition and reconstruction. Select restrooms will receive ADA upgrades and elevators are to be modernized. A moat gap will be constructed around the building perimeter using earth-retention walls. Shoring and earthwork operations will require demolition and reconstruction of the existing site around the building. Underground utilities will be modified or replaced. This project will be performed at an active site where the building is occupied during typical work hours. Provisions of various sorts will be accommodated so as not to disrupt the occupants of the building.

Project Location: 500 West Temple Street, Los Angeles, CA 90012

Work categories include: Monitoring; Food Service Equipment (modifications); Asphalt Paving (with Striping)

Key Dates: Request for Proposals (RFP) issued to Subcontractors via Building Connected website; Proposals Due to McCarthy Building Companies – 08/01/24.

This project requires:

- Prevailing Wages
- Contractor Controlled Insurance Program (CCIP)
- A 100% Performance and Payment Bond from an admitted surety upon award of contract for all trades.
- Community Workforce Agreement (CWA)

McCarthy is an equal opportunity employer and encourages qualified Small Business and Minority Business participation. All qualified applicants will receive consideration for employment without regard to race, religion, sex, or national origin.

WE ARE AN EQUAL OPPORTUNITY EMPLOYER

Project Name: First Aqueduct Treated Water Bifurcation Structures and Hubbard Hill Vents Rehabilitation
Located in San Diego, CA
Owner: San Diego County Water Authority
Bid Date: August 6, 2024 @ 2:00p.m.

Request for DBE sub-quotes

Kiewit Infrastructure West Co. (Kiewit) is seeking sub-quotes from Small Business from SCOOP Network; Small Disadvantaged Business, or a HUB zone business by the U.S. Small Business Administration; or business certified by the U.S. federal government's System of Award Management; or certified as a Disadvantaged Business Enterprise by Caltrans' or by the one of the signatory agencies within the California Unified Certification Program; or Metropolitan Water District of California's Regional/ Small Business Program; or certified by the City of San Diego's Small Local Business Enterprise and Emerging Local Business Enterprise Program; or certified as a Small Business or as a Disabled Veteran Business Enterprise by the California State Department of General Services.

The work generally consists of site preparation, erosion control, structural rehabilitation and improvements to the exterior and interior of bifurcation and vent structures, site grading, paving, fencing, and all other improvements and appurtenant work.

Kiewit is requesting quotes for various areas of work listed in, but not limited to, the scopes of work below: Quality control, aggregate, demolition, dewatering, soil stabilization, asphalt supply, fencing and structural concrete.

Firms interested in providing a sub-quote for this project must contact Kiewit and responding firms will be issued an "Invitation to Bid" through Kiewit's electronic use of Building Connected system (at no cost to bidder) with project information and bid instructions. Plans and specifications are also available for review at Kiewit's office.

Responsive bidders must possess a valid California Contractor's license (as appropriate) and provide acceptable insurance. Responsible subcontractors and material contractors may be required to provide bonding for 100% of their contract value. Kiewit will reimburse bond premiums. Kiewit is signatory to collective bargaining agreements with the carpenters, laborers, cement masons, ironworkers, operating engineers, and teamsters. Kiewit will consider quotes from any, and all bidders who demonstrate an ability to foster and maintain labor harmony on the Project.

Kiewit intends to conduct itself in good faith with all project participants on this project. For further information regarding this project, insurance, bonding, related assistance with equipment, supplies, and materials, or the project schedule, please contact Scott Nelson, our Lead Estimator.

Employment decisions are made without regard to race, color, religion, national or ethnic origin, sex, sexual orientation, gender identity or expression, age, disability, protected veteran status or other characteristics protected by law."

Athletic Trainers Help Workers Get Back to the Jobsite and Stay Healthy After Injury

[Article originally appeared in www.constructionexec.com]

There are a number of factors on an active jobsite that can lead to workplace injuries. Heavy machinery, fast-moving equipment, material handling, loud noises and more can create safety hazards and make it easy to lose focus or become distracted. Additionally, the movements workers have to do in their roles—such as lifting or pushing objects or crouching low to the ground for extended periods—can add strain to the body if not done correctly.

The goal is always to minimize the risk of injury, and yet, incidents still occur. According to 2020 Bureau of Labor Statistics data, slips, trips and falls are the most common injuries, accounting for 18% of non-fatal work injuries resulting in days away from work. When workers are injured, it can lead to downtime, lost productivity on the site and workers' compensation claims.

Employers and site leaders can take various approaches to help workers return to the jobsite safely and effectively and keep them healthy once they return. Introducing an onsite clinic and athletic trainers can help prevent in-

juries, improve worker health, get people back to work effectively and keep them healthy in the long run. Here are three ways athletic trainers help workers get back to the job and improve their overall health.

Injury Prevention

Athletic trainers are a critical asset for worksites looking to reduce injuries and implement prevention strategies that show improvement over time. A huge factor in introducing risk controls on a jobsite is knowing the worker population. Age, physical activity, nutrition, level of experience and conditions like obesity or diabetes can have an impact on injuries.

These health factors can make some workers more prone to severe injury or bruises and cuts. They can also turn a small slip or fall into a more severe surgical case.

Athletic trainers will walk around the jobsite and observe workers as they perform their tasks, allowing them to pick up on population health trends that might require formal, site-wide programs.
